Chevrolet	Traverse (All New)	2024	SORP	July 22 2024	LK0	All
GMC	Acadia	2024	SORP	July 22 2024	All	All

Involved Region or Country	North America
Condition	<p>A metallic type of noise may be heard coming from the area of the rear differential on acceleration.</p> <p>The noise can be heard when initially pressing on the accelerator under light or heavy pressure.</p> <p>The noise may also be heard when lightly hitting the accelerator with the vehicle in Park.</p>
Cause	Software

Correction:

Do not perform any repairs at this time.

Advise the customer that the noise is metallic but is not a safety or wear concern.

Advise the customer that the concern will be resolved in an upcoming software release.

Software will be released through an Over The Air (OTA) update or the dealership will be able to install it when it becomes available.

A bulletin will be released when the updated software is available.
