IMPORTANT VEHICLE INFORMATION UPDATE

2024 Genesis G80 VIN Check Digit Error

This notice applies to your Genesis vehicle, VIN: XXXXXXXXXXXXXXXXXXXX

Dear <FirstName LastName,>

This notice is sent to inform you of a vehicle identification number (VIN) label check digit error. Genesis has discovered that **certain 2024 Model Year G80 and 2024 Model Year G80 Electrified vehicles** have been produced with a VIN label error. Our records indicate that your vehicle, with the VIN shown above, is affected.

What is the error?

These vehicles have an incorrect character in the 9th digit on VIN labels due to an error in the check digit generator at the vehicle assembly plant. On **certain 2024 Model Year G80 vehicles**, the VIN label error is located on the engine and transmission assemblies along with VIN labels on the frame of the vehicle and may have a “D” in the 9th digit. On **certain 2024 Model Year G80 Electrified vehicles**, the VIN label error is located on the traction motors (rear and forward) along with VIN labels on the frame of the vehicle and may have a “P” in the 9th digit.

What will Genesis do?

Genesis has communicated the check digit error to the National Highway Traffic Safety Administration’s (NHTSA) Office of Vehicle Safety Compliance (OVSC). NHTSA OVSC have approved a check digit exception and implemented the changes on NHTSA’s VIN decoder website.

If you would like to check your VIN for accuracy, please visit <https://vpic.nhtsa.dot.gov/decoder>, and enter the 17-digit VIN from the top of this letter. Example from website:

2024 GENESIS - PASSENGER CAR Export to PDF

✓ **Error Text:** 0 - VIN decoded clean. Check Digit (9th position) is correct NOTE: Check Digit Exception - The check digit was given an exception based on data from the OEM indicating an error on production.

Manufacturer: HYUNDAI MOTOR CO

DBAs:

Vehicle Type: PASSENGER CAR

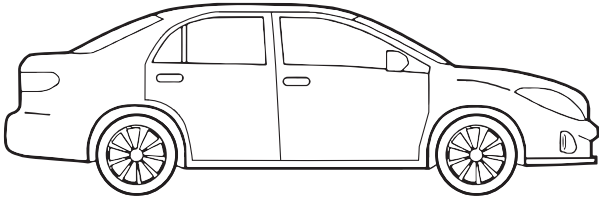

Model Year: 2024
