|-----------------------------------|-----------------------|
| <b>Involved Region or Country</b> | North America         |
| <b>Condition</b>                  | Check Engine Light On |
| <b>Cause</b>                      | DTC P0796 Setting     |

#### Correction:

Some vehicles may experience a check engine light on

This will generally occur with low mileage

Upon investigation Technicians may find DTC P0796 Setting

There may or may not be driveability symptoms with this DTC

If this is found verify the fluid level following Document 4818020

**Note: The transmission fluid must be between 140 and 176 Degrees F to obtain an accurate reading**

If the fluid is low, add fluid to the transmission until it is at the proper level, clear the DTC'S and re-evaluate the vehicle

If DTC P0796 resets following filling the transmission, or if the fluid level is not low and P0796 is setting please replace the valve body

**Note: The Solenoid valve body should not be replaced for this concern**

If the fluid level was low and the DTC does not reset following a test drive release the vehicle back to the customer

#### Parts Information

| Description                             | Part Number | Quantity    |
|---|-------------|-------------|
| Automatic Transmission Fluid<br>HP CVTF | 19355873    | As Required |
