

Delivery Stop STOP710016 for the R 1250 RT and R 1250 RTP

A delivery stop has been announced for the R 1250 RT (K52) and R 1250 RTP (K52) produced between Aug 12th, 2024 to Oct 10th, 2024.

After a quality inspection it was found that the “Emissions Control” and “Noise” labels contain incorrect data.

Affected vehicles are flagged in AIR (Aftersales Information Research) with campaign code STOP710016. Please note, open campaigns or vehicle stops may not appear in DCS Warranty Vehicle Inquiry or sales systems until 24-72 hours after they are announced, therefore AIR is always the recommended method for determining open campaigns and vehicle stops.

If you have a vehicle in your new/used inventory matching the above description it cannot be retailed until repaired.

Next steps are being determined and a bulletin with technical measures will be published once information is available.
