SUBJECT: CX-70/CX-90 (H3T & PHEV) Transmission Assembly Redesign

This Parts Flash replaces Parts Flash 24-01R1 dated September 19, 2024.

Due to a manufacturing change, the CX-70 and CX-90 transmission has undergone a transmission part design change when replacing the transmission assembly. The new/superseded design can be used in place of the old/original design as the coolant hose (D-Code 21-5LX) is no longer needed to be used.

Transmission part numbers beginning with supersession level "A" have had this change.

Please see parts table below.
