Condition

Customer states:

Various customer statements can be mentioned, such as:

- Increased oil consumption.
- Engine not running smoothly.
- Engine maintenance requested.

Workshop findings:

Various workshop findings may be confirmed, such as:

- Carbon deposits in combustion chamber or on injector nozzles, visible using a borescope.
- Misfiring.
- No complaint can be determined (“engine maintenance”).

Technical Service Bulletin

Technical Background 1

Fuel additives can help remove carbon deposits in the combustion chamber, in the area of the piston rings, or in the area of the injection nozzle, for example.

However, a negative impact on the engine life cannot be ruled out.

Production Solution

Not applicable.

Service

The use of fuel additives in vehicles equipped with the EA839 V6 TFSI engine is not approved and therefore also not permitted.

Customer Information:

Please observe the corresponding information in the Owner's Manual of the vehicle. Only Audi-approved petrol additives may be used.

Warranty

This TSB is informational only and not applicable to any Audi Warranty.

Additional Information

All part and service references provided in this TSB (**2075515**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
