

Upcoming HDEP Running Change Releases (9/30/24)

2024 Running Change #2 – MCM & ACM Release

- Will contain fixes that were originally planned for mid-year release.
 - Primary are DD16 overtemp reductions at 2200ft, DD16 2659/0 resolution, and DD15 521173/21 resolution.
 - **2024 DD13HP Gov5 changes will be covered in MY25 SOP alongside the DD13 521173/21 correction in late Q125.**
- DD13/16 submitted for CARB approval on August 28th and DD15 submitted for CARB approval on August 29th.
- Service testing started September 30th.
- **Free service release to all units planned for mid-October (Target 10/22/24)**

2023 Running Change #2 – MCM, ACM and CPC Release

- Will allow above 2024 software package to be used on Gen5 engines built between 2021 and 2023.
 - Excludes DD13TCO builds – 2024 builds do not contain this engine variant so they are set at 2023 software permanently*.
 - Major content includes improvement for 3480/2, resolution of split-shaft PTO VSS concerns, and improvements in SCR efficiency test resolution speed.
- Submitted as part of the 2024 RC2 listed above.
- Service availability same as above.

For limited distribution - Contains Preliminary and Pre-decisional Information Material Only
