

WST x-series unintended wiper sweep

TSB-82-003-WST

Published Date 9-23-2024

- Trucks built prior to ASAM2021 have a race condition with the wiper motor
- If the wiper motor is powered before the ASAM, the wiper will swipe one time at key on
- WST 47X, 49X, 57X
- ASAM Controllers are not backward compatible and cannot be reprogrammed so motors need to be replaced to correct the issue
- Limited quantity of current wiper motors are available in PDC
- When supply of motors is used up, the entire wiper system will need to be replaced (motor, linkage and arms)
