<b>Title</b>	Noise from PIVI Rear entertainment when using iPhone 15 and 16 or 10th Generation Ipad
<b>Category</b>	Electrical
<b>Last modified</b>	15-Oct-2024 00:00:00
<b>Symptom</b>	207000 Entertainment Systems

**Content**

Issue:  
A concern has been identified where abnormal noise may be heard through rear seat infotainment system when using Iphone 15 and 16 models and 10th generation Ipad

Cause:  
Concern is due to new USB-C output from Iphone 15 and 16 models and 10th Generation Ipad modules causing audio interference when playing through rear seat infotainment and is under investigation now.

Action:  
Do not perform any programming or component replacement for this concern. Please submit an EPQR to report all such cases to allow escalation to engineering for further review.

**Note:** SSM will be removed once a solution for this concern is available.
