

Service Bulletin

Bulletin No.: 19-NA-042

Date: October, 2024

INFORMATION

Subject: Yellow Tint to ZR1 Hood and Engine Cover Exposed Carbon Fiber Parts

Brand:	Model:	Model Year:		VIN:		Engine:	Additional RPOs
		from	to	from	to		
Chevrolet	Corvette ZR1	2019	2019	—	—	All	All
	Corvette	2020	2025				Coupes equipped with RPO ZZ3 or SLN

Involved Region or Country	North America, Europe, Middle East, Japan
Condition	Some customers may comment the exposed carbon fiber engine appearance panels for the C8 generation vehicles, or the ZR1 exposed carbon fiber hood parts appear to have a yellow tint appearance when compared to other exposed carbon fiber parts.
Cause	The cause of the condition may be that the carbon fiber hood and engine cover use a different impregnated carbon fiber resin, which is more heat resistant. The different resin may cause a color shift; and the lighting source and direction of view will sometimes highlight this color shift.
Correction	There is no problem with the paint application on these carbon fiber parts, and NO repair attempts should be made to change the color of the parts.

Important: Service agents must comply with all International, Federal, State, Provincial, and/or Local laws applicable to the activities it performs under this bulletin, including but not limited to handling, deploying, preparing, classifying, packaging, marking, labeling, and shipping dangerous goods. In the event of a conflict between the procedures set forth in this bulletin and the laws that apply to your dealership, you must follow those applicable laws.
