

Model Series 167 - Unable To Fold Seats In Second Or Third Row With Trunk Switches

Topic number	LI91.29-P-078588
Version	1
Function group	91.29 - Seats - electrical system
Date	11/15/24
Validity	Model series 167 (GLS) except Maybach
Reason for change	

Complaint

One or more of the seats in the second or third row cannot be folded over when the switch group in the trunk is used.

Cause

Under analysis.

Remedy

Please thoroughly check the physical layer such as operating switches, lines, and pins to make sure that they are not the reason for the fault.

Verify the switches are showing correct actual values with the Xentry.

Verify the seats fold properly when using other switches.

After this, create a TIPS case and attach a control unit log for the corresponding control unit along with a CAN trace from the body CAN that documents the problem.

Note: The trace should be for at least five minutes with the error actively occurring.

Send the TIPS case to the Body/Chassis/Entertainment inbox.
