Emissions Recall: R 1250 RT/RTP Replace Emissions and Noise Labels

MODEL

Model	Model Description	Model Code
K52	R 1250 RT, R 1250 RTP	0L03

The affected vehicles have been marked with campaign number **0000711200** in AIR.

In order to determine if a specific motorcycle is affected by this campaign, it will be necessary to verify the vehicle VIN in AIR (Aftersales Information Research). Based on the response of the system, either proceed with the repair or take no further action. Please note, open campaigns or vehicle stops may not appear in DCS Warranty Vehicle Inquiry or sales systems until 24-72 hours after they are announced, therefore AIR is always the recommended method for determining open campaigns and vehicle stops.

SITUATION

After a quality inspection it was found that the “Emissions Control” and “Noise” labels contain incorrect data.

The affected vehicles have been placed under the delivery stop **STOP710016** associated with campaign number 0000711200, which will be lifted upon completion of this technical campaign.

PROCEDURE

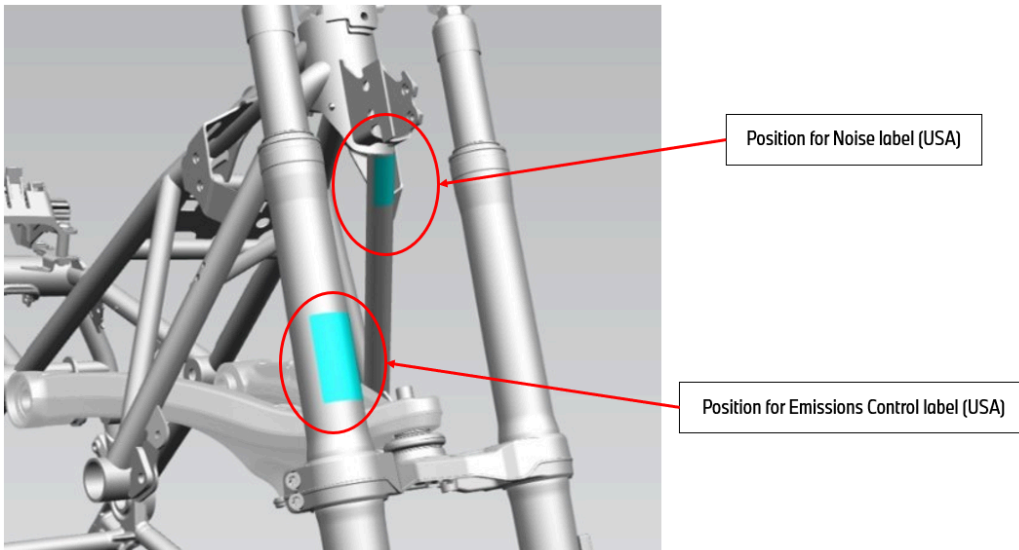

For vehicles that have not yet been delivered, the service action must be completed before vehicle handover.

In all instances in which the vehicles have already been handed over to customers, the Technical Campaign must be performed at the next workshop visit.

Replacement Tire and Emissions control labels must be adhered to the frame or fork location listed as shown.

NOTICE: The previous label must be removed, and the frame and fork must be carefully cleaned before placing the new labels.

NOTE: Using a little heat from a heat gun (very cautiously) helps loosen the adhesive and chain lubricant spray is known to help remove adhesive without damaging the finish.

PARTS INFORMATION

Obtain and confirm the part numbers for your specific vehicle by entering the chassis number in ETK which takes into account specific equipment and/or options.

Additional parts like gaskets, hardware and chemicals may be required for the complete repair.

ORDERING:

DO NOT ORDER using normal ordering procedures for these part numbers below as they are coded parts and if you order using the coded parts ordering you will have a 2-3 week wait time before the label is printed in Germany and shipped. We preordered the labels for the affected units in bulk to cut this shipping time down.

UNITS IN DEALER INVENTORY (AUTO SHIPPED)

Labels will be auto shipped with the amount required per a dealer to complete their affected in stock vehicles per our reporting system.

- This reporting may not document dealer-to-dealer transfers. If this is the case and you receive and incorrect amount due to a dealer-to-dealer transfer, then we request you send the appropriate labels to the dealer that now has the unit.

RETAILED UNITS (IDS ORDER REQUEST)

For units that have been sold already, the dealer must request the required labels (listed below) via an IDS ticket.

Because labels are being provided at no cost they cannot be claimed under the recall.

Part Number

71 22 8 870 371	Emissions Control Information Label (USA)
71 22 1 540 471	Noise Label (USA)

CLAIM INFORMATION

Please submit claims via the normal claim process using the information below:

Defect code

00 00 71 12 00	Replace Labels
----------------	----------------

Copyright ©2024 MOTORRAD USA, a division of BMW of North America, LLC. All Rights Reserved

Labor Operation

00 60 350	Replace Labels	4 FRU
+00 60 725	Replace Labels	3 FRU
