

SSM 53172 2023-2024 F-Super Duty - 6.7L Diesel - Cold Weather Front Grille Cover Poor Fit On XL/XLT Trim With Halogen Headlamps

Some 2023-2024 F-Super Duty vehicles with XL/XLT trim package and equipped with a 6.7L diesel engine, halogen headlamps and an engine block heater may have fit concerns of the provided front grille cover advised for usage in cold weather. The front grille cover installation instructions have been revised to improve fit of the cover on XL/XLT vehicle trim and halogen lamp configuration. Instructions can be found on the Professional Technician System (PTS) website under the Workshop Manual tab > Accessories > Installation > 2023-CMY Super Duty - Front End Grille Cover. The front grille cover should only be used in temperatures below 50°F (10°C) or 32°F (0°C) when towing otherwise reduced engine performance could result.
