

OWNERS HANDBOOK ADDENDUM – CRUISE CONTROL

Triumph is aware that the speed requirements for activating Cruise Control, where fitted, are notated incorrectly in Owner's Handbooks for some models.

Customers may note that it is described in their handbook as requiring the motorcycle to be travelling at a speed between 19 to 100 mph (30 to 160 km/h).

The correct value should be 29 to 100 mph (46 to 161 km/h).

An addendum to address this has been published to TOL - please inform customers as necessary and ensure they are aware of the correct speed values when attempting to activate Cruise Control.

If you have any additional questions, please contact Triumph Customer Support at (888) 284-6288.
