57 Key: LED in remote control key does not flash when a button is pressed

57 24 69 2076136/1 November 26, 2024.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A5, S5, A6 e-tron, S6 e-tron, Q5, Q5 e-tron, Q5 Sportback, SQ5, SQ5 Sportback, Q6 e-tron, and SQ6 e-tron	2025	All	Not Applicable

Condition

Customer states:

- The LED in the key does not flash when a button on the key is pressed.

Technical Background 1

On Audi Q6 and subsequent PPE (Premium Platform Electric) and PPC (Premium Platform Combustion) models, the LED in the key only flashes after successful communication with the vehicle has taken place.

This means that the LED in the key will not flash in certain situations, for example, when a button on the key is pressed while the key is not within range of the vehicle or when there is a communication issue between the key and the vehicle.

If the LED does not flash, this is not necessarily indicative of a faulty key or drained key battery.

This information may be shown differently in the Owner's Manual.

Production Solution

Not applicable.

Service

- Do not perform any repairs. Any repairs for this concern may be denied.
- Instruct the customer that this condition is normal.
