

Bulletin No.: PIT6258

Published date: 10/9/2024

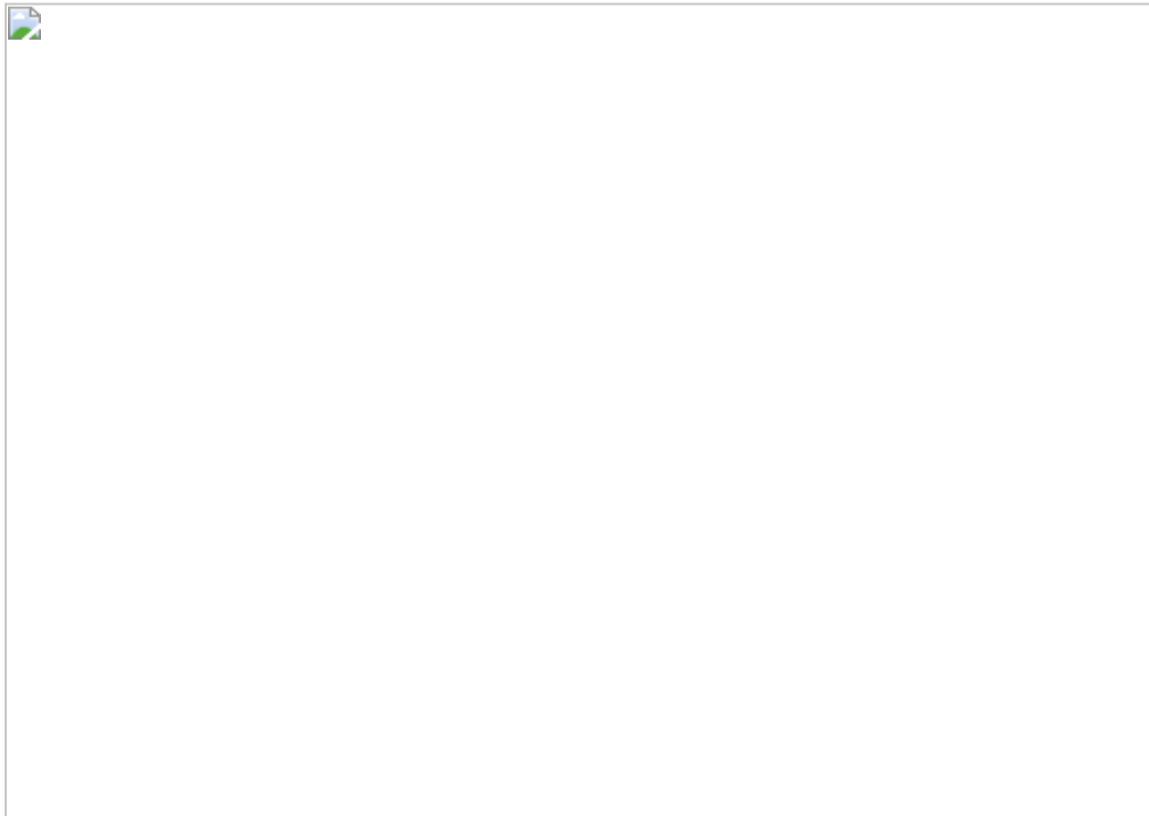

Preliminary Information

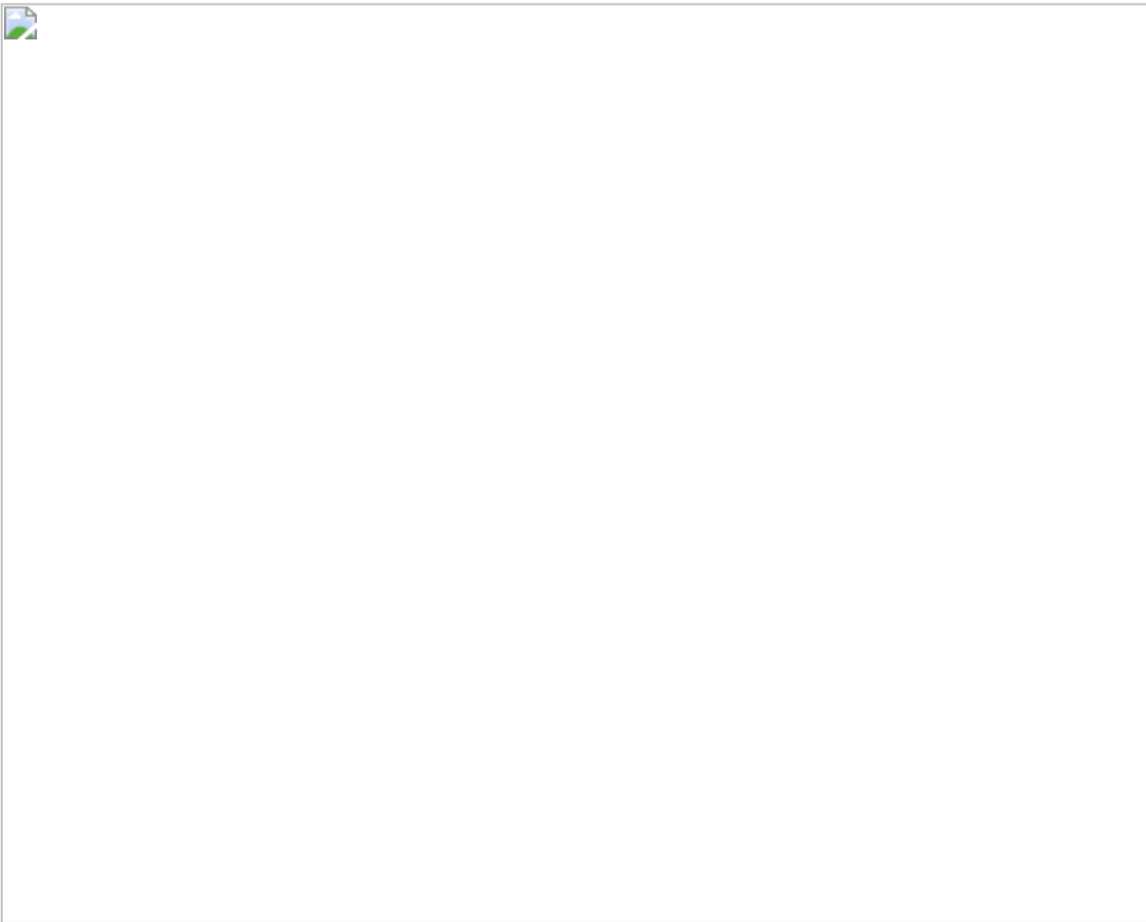

PIT6258 Diagnostic Tip Poor A/C Performance Due To Refrigerant Leak

Models

| Brand: | Model: | Model Years: | VIN: from to | Engine: | Transmissions: |
|---------------|-----------------|---------------------|-------------------------|----------------|-----------------------|
| Cadillac | Escalade Models | 2024 | All | All All | All |
| Chevrolet | Tahoe | 2024 | All | All All | All |
| Chevrolet | Suburban | 2024 | All | All All | All |
| GMC | Yukon Models | 2024 | All | All All | All |

| | |
|-----------------------------------|--|
| Involved Region or Country | North America |
| Condition | Some customers may comment on a lack of a/c performance. When performing normal diagnostics, it maybe found that the system is low on refrigerant charge. |
| Cause | The cause of this condition could be a leak from a poor weld at the rear a/c line set, see location below. |

Correction:

If a leak is found at this area, then follow normal SI repair instruction.

Warranty Information

For vehicles repaired under warranty, please use the appropriate warranty labor operation based on the actual cause and repair.
