INFORMATION

Isuzu is pleased to announce that all current inventories of commercial vehicle instrument panel cluster (IPC) assemblies, speedometers and sub meter assemblies now have the odometer replacement sticker included.

This bulletin is to remind dealers whenever the IPC assembly is replaced in an affected Isuzu manufactured vehicle, they are to affix an odometer replacement sticker, as the odometer is not programmable. The sticker should be filled out completely with the date of replacement along with the mileage from the previous odometer reading, and the dealer code of the dealership replacing the IPC.

Please ensure to record the following by filling out the sticker clearly using a black or blue ballpoint pen (See Figure 1.).
