Date	Rev	Revision (Rev) Description
2024-11-12	-	Initial release

Purpose for Parts and Accessories Bulletin

To inform dealerships of a new Vehicle Identification Number (VIN) and Calibration search function for the Screamin' Eagle Pro Street Tuner (Bluetooth).

Vehicles Affected

2021-2024: Milwaukee-Eight powered CVO, Softail, Touring and Trike vehicle's.

Markets Affected

United States, Canada, Mexico and Australia markets affected.

Summary

A new VIN and Calibration search function has been added to the Screamin' Eagle Pro Street Tuner software landing page. This functionality enables a customer or dealership the ability to enter their VIN into a search prompt and return all available Screamin' Eagle calibrations associated with that VIN.

Before the installation of any Screamin' Eagle accessories, it's important to make sure the appropriate calibration is available on the software or Cloud for download. This search function will assist with that check.

The VIN and Calibration look up can be found on the Pro Street Tuner software landing page: <https://streetperformancetuner.harley-davidson.com/StreetTuner.aspx>
