- Figure 1 shows the incorrect configuration that it is now.

2. Disconnect the power wire coming in that powers the monitor panel (water pump & water heater) and middle 2 switches (interior & exterior light switches). (Figures 2-3)

Fig. 2

Fig. 3

3. Disconnect the Red wire that feeds the monitor panel which should be (water pump, water heater switches) this wire should be going to a 5 hole wago. (Figures 3 and 4)

Fig. 4

Jayco's sole obligation under our limited warranty is to repair or replace defective materials and/or workmanship deemed our responsibility as determined by Jayco in our sole discretion. Jayco reserves the right to use new and/or remanufactured parts or materials of similar quality to complete any work, and to make parts and/or design changes as appropriate without notice to anyone. Jayco designs and/or materials changes are done without obligation to incorporate such changes in previously manufactured product. Jayco makes every reasonable effort to ensure field remedies will not adversely affect performance and/or safety of the unit. This field remedy is not intended to extend to future performance of this RV, or any of its materials, components or parts beyond the standard warranty period. The RV owner's obligation to notify Jayco, or one of its independent, authorized dealers, of a claimed defect does not modify any obligation placed on the RV owner to contact Jayco directly when attempting to pursue remedies under state or federal law.
