Work Instructions

M2 Plus and SD Plus vehicles built from May 9, 2023, through March 28, 2024, and equipped with a Cummins engine may experience an issue where the virtual regen request switch is not enabled in the ICUC, preventing the driver from manually requesting a regeneration. See [Fig. 1](#) and [Fig. 2](#). Refer to Freightliner publication [TSB 54-371](#) for instructions to update the ICUC.
