Version	2
Function group	07.61 - ME fuel injection/ ignition system
Date	1/21/25
Validity	Any 463 G-Wagon Equipped with a MED1775 engine control unit
Reason for change	added another campaign

Complaint

After performing a software update either for recall campaign 2023070022 and/or 2022080005 or general course of diagnosis the vehicle will not start and/or the software flash will not complete.

Cause

Newer software releases are incompatible with older HW object numbers (ME part numbers).

Remedy

If a no start condition is encountered after a software update, check the ME and VGS control unit part numbers.

Open an XSF ticket with the PN's and explain what software is attempting to be flashed.

Afterwards continue with the repair as normal and quality check the vehicle.

If any issues arise open a TIPS case and forward it to market support.

Disclaimer

NOTE: The information contained in this document is intended for use by trained, professional technicians with the knowledge to properly and safely perform diagnosis and repairs on Mercedes-Benz vehicles, using Mercedes-Benz approved tools and equipment. It informs service technicians about conditions that could occur in certain vehicles and provides information that could assist in proper vehicle diagnosis, service, or repair. It does not indicate that a defect is present in any vehicle referenced in this document nor does it imply warranty coverage. DO NOT assume that a symptom or condition, or a described cause of a symptom or condition, affects any particular vehicle or groups of vehicles, or that a described repair applies to any particular vehicle or groups of vehicles. There can be multiple causes resulting in the same or similar symptoms or conditions described in this document, and trained professional service technicians must use their diagnostic skills to make evaluations on a case-by-case basis. The information contained in this document does not guarantee warranty coverage nor does it extend the vehicle's warranty in any way.

Symptoms
Power generation > Engine management > Engine start/stop > Does not start

XENTRY Tips

Power generation > Engine management > Engine performance > No/poor output
