

2022 MY F-150
Powertrain Control Module – PCM
PT-24.21.6

Priority Update - Engine and Climate Optimization

Primary Drive Control Module

PT-24.21.6

1

Enhanced Engine and Climate Performance

This update improves your vehicle's Air Conditioning system to provide more consistent airflow from the vents, helping maintain a comfortable temperature inside your car.

This update improves the accuracy of your vehicle's software to prevent an unintentional AAD (Active Air Dam) message that may display on your instrument panel.
