Revision Table			
Instance Number	Published Date	Version Number	Reason For Update
2022548/14	2/12/2025	19-17-01	Update model and model year applicability.
2022548/10	5/22/2023	19-17-01	Introducing new engine coolant and updating model and model year applicability.
2022548/9	2/24/2022	19-17-01	Adding G12Evo and updating model and model year applicability.
2022548/1	3/17/10	V191002	Original publication.

**Technical Background**

The latest formulation of G12Evo coolant, by Valvoline, is backwards compatible with all engine concepts. All previous variations of coolant have been replaced by this formulation of G12Evo.

**Production Solution**

G12Evo coolant has been introduced as the factory fill coolant in current production.

**Service**

Since G12Evo - Valvoline is now backwards compatible with all engine concepts, any vehicle needing coolant can use this formulation of G12Evo. This includes vehicles that are refilling the complete system and vehicles getting coolant top offs. This formulation of G12Evo can now be mixed with any previous coolant variation.

**If you suspect that a vehicle has been filled with contaminated or non OEM coolant, the cooling system should be drained using the repair manual procedures in Elsa and then filled with G12Evo.**

**Cooling system drain and fill due to contaminated or non OEM coolant mixing is not covered by warranty.**

Information only.

Please refer to Warranty Communication VWC-23-04 to determine SAGA claiming procedures.

**Required Parts and Tools**

No Special Parts required.

**Additional Information**

All part and service references provided in this Technical Bulletin are subject to change and/or removal. Always check with your Parts Dept. and Repair Manuals for the latest information.
