DCSnet Message  
**Urgent**

Subject: **Update - Delivery Stop: Integrated Fuel Module**

The Remedy is now available for vehicles affected by Delivery Stop: Integrated Fuel Module (B16 01 25) and the bulletin has been updated on TIS.

Due to system processing times, the "Remedy Available" Green Check may not display in ROSS systems yet; this will update in the coming days. However, the Remedy is available for all VINs and can be performed.

If an RDR override is necessary due to the system displaying the Stop, you can enter the RO number and date the programming was performed.

If vehicles have any other open Campaigns, they must be completed prior to delivery to the customer.

Sincerely,  
Technical Service
