DCSnet Message  
**Urgent**

Subject: **B16 01 25 Integrated Fuel Module Delivery Stop Software Update**

We would like to give everyone a heads up that our testing and validation of the software SDP4.52.15 with I-Level S18A-25-03-530 internally went very well today.

This is the software needed for the IFM Delivery Stop

**Friday morning**, we will have a call with Munich and at that time expect to release the software to all dealers.

Once the software is available, we will inform you right away.

Please allow proper download and installation time once you receive confirmation that the software is available Friday morning.

Thanks,

Technical Service
