

Exterior Trim Options

FREIGHTLINER

Updated Exterior Trim Options

What is it?

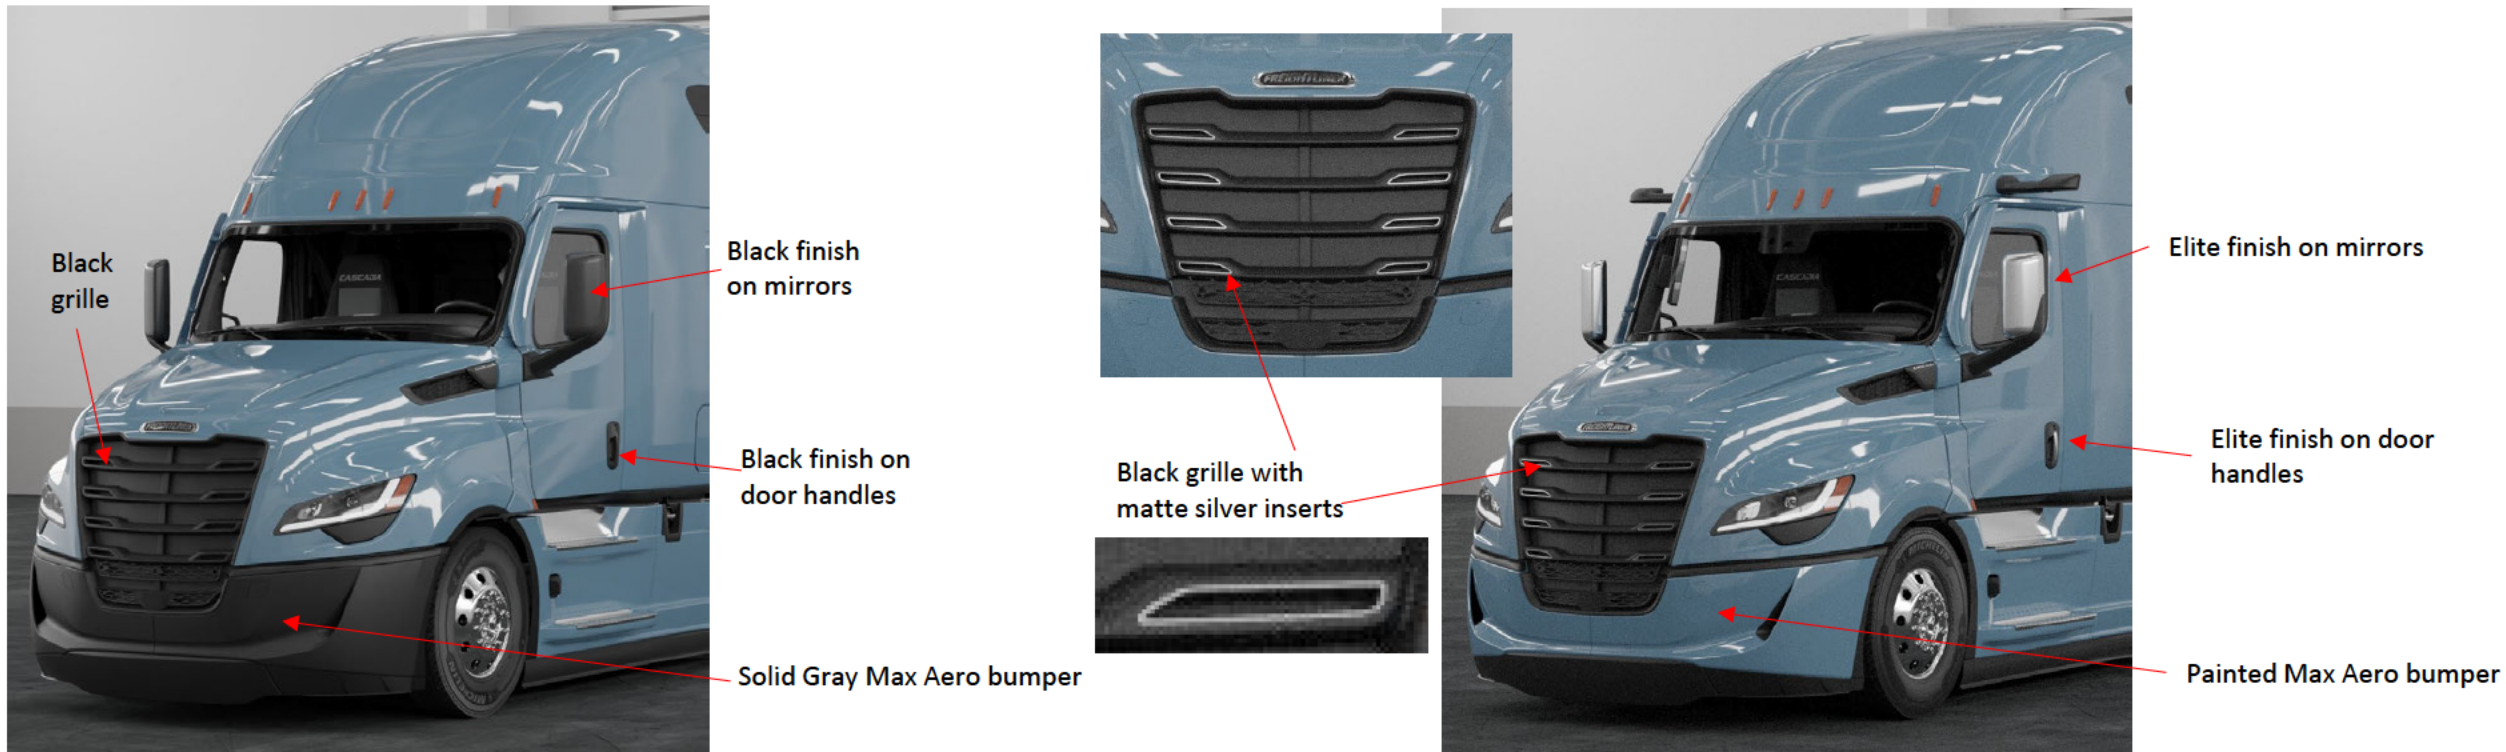

The fifth generation Cascadia features two exterior trim options for the grille, mirrors, door handles and bumper. Trim options allow for customizable black (standard) finishes or "Elite" (optional) finishes. The traditional styling on the mirrors and door handles will remain the same from previous generations, while new matte silver inserts will be available on the grille (see image below). Package codes are available for the Blackout Trim and the Elite Exterior Trim for ease of spec'ing, but options are also available a la carte.

Why is it important?

New sleek and modern design to our most fuel-efficient Cascadia, providing an enhanced fleet look and feel. Black trim options continue to provide durability making the finish easy to maintain and look better over time.

Key Features:

- Updated designs for a sleek modern look to the grille, air intakes, hood and bumper
- Customizable options based on customer preferences, from the standard black trim to the up-level elite trim option
- Predetermined package codes (optional) for ease of spec'ing or fully customizable solutions
- The Aerodynamic Bumper and Max Aero Bumper are both available in mold-in color and painted based on customer preference

Standard Trim Option– Black Out Exterior Package

Matte Silver Inserts

Up-Level Trim Option – Elite Exterior Package
