91 PSS myAudi app: auxiliary air conditioning starts in vehicle but negative response in app

Release date: Mar 10, 2025

Condition

Customer states:

The auxiliary air conditioner is started via the myAudi app. However, the myAudi app displays a negative response. After 1 to 2 minutes, the myAudi app then also indicates that the auxiliary air conditioner is running. This issue occurs intermittently.

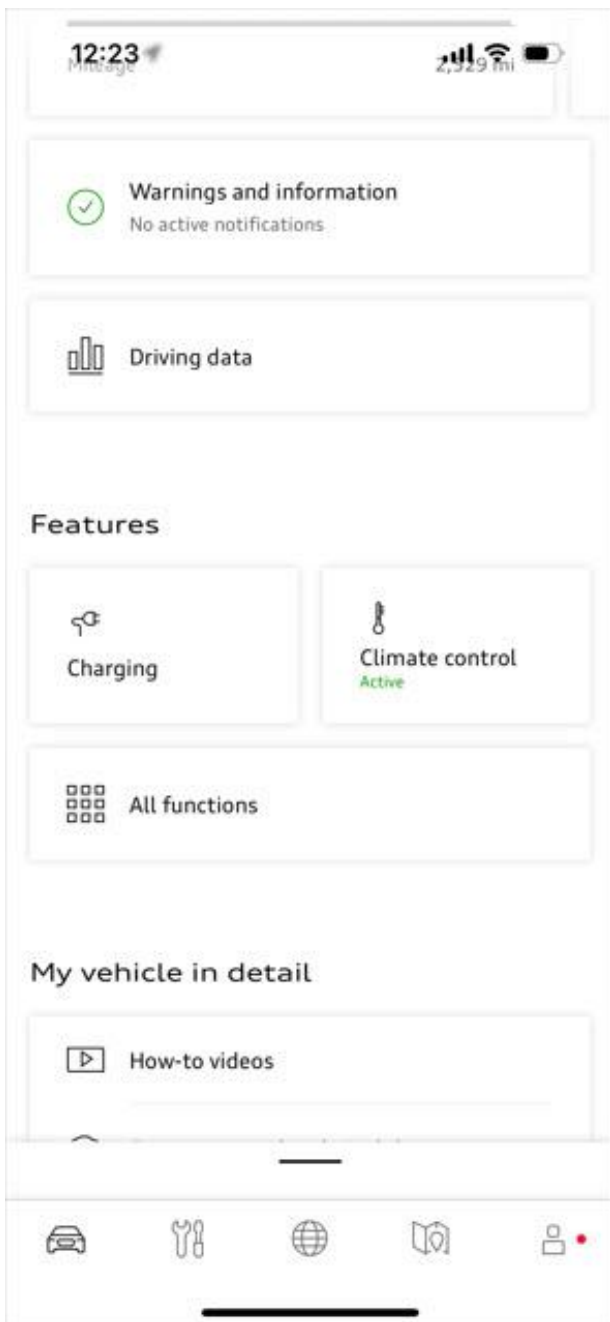

Translation:

Auxiliary air conditioner could not be started.

Your vehicle currently cannot be reached.

Please try again later.

Error: E:CV.PA.29

Workshop findings:

The complaint can be reproduced in the workshop.

The complaint occurs **intermittently**.

If the issue reoccurs continuously for several days, this TSB must not be used and a ticket opened with the Technical Assistance Center (TAC).

Technical Background

Due to multiple backend-related issues, the myAudi app may intermittently receive no response when the air conditioning is started and may therefore display a negative response.

Production Solution

Not applicable

Service

1. Explain to the customer that a solution is expected to be available by the end of the third quarter of 2025 (subject to change) and that no repairs are necessary at this point.
2. Do not replace any components for this condition since this will not resolve the customer's concern.
3. Create a PSS record in the PSS application through the Pending Service Solutions (PSS) link in AccessAudi (under *Related Links >> Service*).

Warranty

This TSB is informational only and not applicable to any Audi Warranty.

Additional Information

All part and service references provided in this TSB (**2077207**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
