

OTA v2.6.11 Exterior Rear Door Handle

Updates & Fixes

This new software release includes a critical update that remedies an issue that may cause the rear doors to open if the driver presses unlock while the vehicle is stopped, and possibly if moving less than 1.2 miles per hour. Lucid is continuing to examine this issue and will notify you if any further action is needed.

Please install this update immediately to keep your Lucid Air functional, safe, and secure.
