Porsche Tester IV Online Update 43.300.010 & .011

Work
Procedure:

Installation of the software update via Online Update

Important!

The download process must be started by user once an online connection is available. Select "Update" in the "Tools" menu to view the current update availability status. If an update is shown, select "Start Download". Installation of the releases must be started manually after the download has completed by pressing the "Start installation" button. Prerequisite: PPN Porsche Tester License registration must have been carried out successfully.

1. Connect Porsche Tester IV to an external power supply and start it.
2. Start installation using menu item "Tools - Update" then select "Start Installation" on the Porsche Tester 4 user interface.
3. After successful installation, Porsche Tester IV will need to restart.
4. After the restart the update has now been completed.

Porsche Tester IV Online Update 43.300.010 & .011

43.300.009	3/24/2025
43.300.010 & .011	3/26/2025

Further information:

- PT4G testers can only be updated from the current software level.
- PT4G testers cannot be backdated or targeted for a specific older software level.
- If a software restore is to be performed, the tester will install the most current software release available.
- When a new update is installed, only the objects that have been added/changed are installed to save time during the update process.

Online update, Fazit, PPN access and VAL data transfer:

The "Online Update", "Fazit Access", "PPN Access" and "VAL Data Return" functions can only be run if the network settings and any proxy settings that are used were set correctly and if a valid PT4G device certificate was created successfully for the Porsche Tester 4 being used for access. The user must have PPN access and must be allocated to the device certificate.
