Case Number: S251400001

Release Date: April 2025

Symptom/Vehicle Issue: Fuel Odor/Leakage

Customer Complaint/Technician Observation: Customer's complaint may include a fuel odor or fuel leakage under the vehicle. Upon investigation, the technician may find fuel leakage on top of the fuel tank.

Discussion: If the fuel leakage is suspected of coming from the top of the fuel tank, follow published Service Information procedures to remove the rear seat to access the right-side fuel pump cover. Remove the right-side cover to access the top of the right-side fuel pump module. Check the fuel supply line connection to the fuel pump module by performing a "pull/push" at the connector.
