Title: Engine Emission Label Replacement, Certificate of Conformance and Clean Idle Sticker Addition Procedure

Applies To: All Navistar Powered Trucks Requesting Engine Emission Label Replacement, Certificate of Conformance and/or Clean Idle Sticker, Clean Truck Check

CHANGE LOG

Please refer to the change log text box below for recent changes to this article:

04/24/2025 - Added Clean Truck Check info
12/17/2024 - Added details about new CMS case submission
08/20/2020 - Updated author
03/23/2020 - Updated sentence structure for provided info. Changed shipping from UPS to FedEx.
10/29/2019 - Updated info for Reman Labels

DESCRIPTION

This article describes how to get a replacement Emissions Label, Certificate of Conformance or Clean Idle decal for a Navistar/International engine.

You will need to contact Cummins for those same labels for a Cummins engine.

PROCEDURE

Navistar/International engine emission labels (except CV), Certificates of Conformance, and Clean Idle decal additions will be provided by the Vehicle Programming Group, via the iKNOW system. The cost per replacement is \$100.00 (US Dollars) each + shipping fees.

Clean Truck Check (emissions label replacement/engine family request process)

1. Dealer must verify the request from the customer. Label replacement or Engine Family Name for CTC (Clean Truck Check)
2. Dealer must verify if the vehicle is equipped with the original or a replacement engine—document the engine serial number with photos. [IK1201388](#)
3. Once verified, open a Vehicle Programming Case file in CMS – refer to the following information: [IK3000111](#).
4. Request Engine Family information and/or Replacement emissions label

Note: Replacement emissions labels can ONLY be provided for the vehicle's original installed engine.

- o **REMAN ENGINE** - If the vehicle is equipped with a replacement engine, attach a clear photo of the ESN from the engine block and a photo of the engine label from the remanufacturer verifying the replacement engine for application. The Engine Family Name will be provided in the case file by the Programming Team.

- **OEM ENGINE** - If the vehicle is equipped with the original engine, please attach four photos to the case file showing the top and both sides of the engine and the ESN from the side of the block. The Engine Family Name can be provided in the case file by the Programming Team. If a replacement emissions label is required, please specify as such in the case file, and an order will be placed.
 - If a replacement label for a reman engine is required, please see the contact information in [IK1201388](#) (**note: A replacement label will not contain engine family information**)
5. If the customer is adamant that an OEM replacement emissions label is needed for a reman engine:
- Note:** Replacement emissions labels can ONLY be issued for original engines
- If the engine has been replaced with a certified replacement, the compliance team can draft a letter specific to that VIN and ESN and provide the Engine Family Name to keep in the vehicle at all times.
 - The case file will be sent to International's Compliance Team for review to obtain this letter.

INTERNATIONAL ENGINES

To obtain an engine Emission Label, Certificate of Conformance, or Clean Idle decal, please submit a request through the new CMS (case management system) by creating a case file for **EACH VIN**. **Please be sure to submit this case file to the Vehicle Programming group.** See [IK3000111](#) for instructions on how to submit a case file in the new CMS. Please provide information such as engine build year, horsepower rating, engine model and engine serial number.

INTERNATIONAL ENGINES IN FORD VEHICLES

For requests for International engines in Ford vehicles, have the customer email FordLabelRequest@bluediamondparts.com with the Ford VIN and other engine information. There is no need for a case file with Navistar.

INTERNATIONAL CV

For International CV/International 6.6 engine, the Engine Label is ordered via the TSC replacement label process. See [G-6355](#) or [PL1600001](#) for additional information.

To obtain a Clean Idle decal, please submit the request through the new CMS (case management system) by creating a separate case file for **EACH VIN**. **Please be sure to submit this case file to the Vehicle Programming group.** See [IK3000111](#) for instructions on how to submit a case file in the new CMS.

REMANUFACTURED ENGINES

Replacement labels for Remanufactured engines need to be obtained from the company that remanufactured the engine.

Notes:

- If you already have a case file open for a request such as a Horsepower change, CARB Change, etc. then you do not need to open an additional case file for this request as the request will be handled in that case file.
- The Emission Label and Certificate of Conformance processing time can take up to 2 weeks.
- All processed and completed engine Emission Labels, Certificate of Conformance and/or Clean Idle Stickers will be shipped to the dealer via FedEx.
- If you have questions, please ask in the case file or contact **Vehicle Programming Tech Service** You can find their contact information in document [SH2500010](#)
