

WPD8 Workshop campaign - Re-programming high-voltage battery control unit

WPD8 Workshop campaign - Re-programming high-voltage battery control unit

ID Number	WPD8
Model(s)	Cayenne (9YA/9YB) Panamera (971)
Model Year(s)	2017 - 2023
VIN List	Attached
Number of Affected VINs	6,085
Issue Description	Due to a software error in the high-voltage battery control unit (BMC), the calculation of the calibration test number (CVN) cannot be carried out in full on the affected vehicles. This may lead to incomplete output of the on-board diagnostics in the event of a fault in the high-voltage battery (BMC) control unit. As a result, country-specific regulations are not met.
What Porsche Centers Should Do	For this reason, the high-voltage battery (BMC) control unit on the affected vehicles must be re-programmed with a corrected data set. During the next workshop visit, please arrange for this action to be carried out on the affected vehicles (Repair available as of 04/10/2025)
TI	WPD8
Part Status	Status 0

Required software

PIWIS Tester 4 test software version	43.300.010 (or higher)
--------------------------------------	------------------------

If other programming campaigns that affect the same control unit and entail an identical procedure are open for a vehicle in addition to this campaign, the affected control unit only needs to be programmed once using the current PIWIS Tester test software.

WPD8 Workshop campaign - Re-programming high-voltage battery control unit

Please proceed as follows for the campaigns that have not been carried out:

- Mark the campaign as 'cannot be carried out' with the reason "Modification of the affected component" in PQIS. The "Warranty relevance" flag must be activated in order to be able to set a warranty claim and close the campaign.
