

TECHNICAL INSTRUCTIONS

FOR

SPECIAL SERVICE CAMPAIGN 25LC01

LOW-PRESSURE FUEL PUMP

CERTAIN 2019 ES 300h VEHICLES

The repair quality of covered vehicles is extremely important to Lexus. All dealership technicians performing this repair are required to successfully complete the most current version of the E-Learning course "Safety Recall and Service Campaign Essentials". To ensure that all vehicles have the repair performed correctly; technicians performing this repair are required to have completed the following course.

- LIC206A - Electrical Repair 1

It is the dealership's responsibility to select technicians that have completed the above courses to perform this repair. Carefully review your resources, the technician skill level, and ability before assigning technicians to this repair. It is important to consider technician days off and vacation schedules to ensure there are properly trained technicians available to perform this repair at all times.

I. OPERATION FLOW CHART

The flowchart is for reference only. DO NOT use it in place of the full technical instructions. Follow ALL steps as outlined in the full technical instructions to confirm the campaign is completed correctly.

II. IDENTIFICATION OF AFFECTED VEHICLES

1. CHECK VEHICLE FOR CAMPAIGN ELIGIBILITY

- Compare the vehicle's VIN to the VIN listed on the Repair Order to ensure they match.
- Check the TIS Vehicle Inquiry System to confirm the VIN is involved in this Campaign, and that it has not already been completed.

Note: TMNA warranty will not reimburse dealers for repairs completed on vehicles that are not affected or were previously completed, even by another dealer.

III. PREPARATION

A. PARTS

Model	Part #	Qty	Description
ES 300h	04009-86325	1	KIT, PUMP, FUEL
(VIN begins with JTH)	04009-80747	1	REPLACEMENT KIT, FUEL PUMP

Warranty will only reimburse dealers for the part numbers listed. Any other part numbers will not be accepted on the campaign claim.

B. TOOLS & EQUIPMENT

- Standard Hand Tools
- Torque Wrench
- Air Blow Gun
- Gas Caddy (minimum 25-gallon capacity)

C. MATERIALS

- Brake Cleaner

D. SPECIAL SERVICE TOOLS

The ES 300h uses a cam lock retainer type for the fuel pump assembly in the fuel tank.

Type:	<u>Cam Lock</u> 
Option 1 SST	<u>SST</u>  Sender Lock Nut Wrench Kit (09808-14031) Claw: 105mm Jaw Set (09808-01070) Crossbar (09808-01030)
Option 2 Campaign Tool (improved design over SST)	<u>Campaign Tool:</u> Cam Lock Retainer Jaws  Requires use of the Handle from the Fuel Sender Lock Nut Wrench Kit, or a 1/2" breaker bar.

IV. BACKGROUND

The subject vehicles are equipped with a low-pressure fuel pump which may stop operating. If this were to occur, warning lights and messages may be displayed on the instrument panel, and the engine may run rough. This will lead to the vehicle entering a failsafe driving mode in which the vehicle can still be driven for certain distances.

V. SAFETY PRECAUTIONS

CAUTION:

- When installing/uninstalling the fuel system components, keep safety first in mind and carefully observe the following instructions to avoid accidents:
- a. When working on the fuel system, display a Flammable - Keep Fire Away sign.
 - b. Smoking is prohibited nearby.
 - c. Perform this work in an area where there are no sparks nearby from the operation of welders, grinders, drills, electric motors, stoves, etc.
 - d. **DO NOT** use electrical devices nearby because they can become hot and the operation of power switches can generate sparks.
 - e. **DO NOT** use iron or steel hammers while working, because they may generate sparks.
 - f. **DO NOT** start engines even in adjacent stalls.
 - g. Prepare fire extinguishers before starting any work.
 - h. Perform this work in a well-ventilated area (natural ventilation). **DO NOT** use exhaust fans or electric fans, because their motors might generate sparks.

- i. Since it is possible for fuel vapor to build up, **DO NOT** work in or near a pit.
- j. If fuel is spilled, use shop towels or similar material to quickly wipe it up and then use compressed air to diffuse the fuel vapor.
- k. Shop towels and other materials that have come into contact with fuel should be dried in a well-ventilated area and then disposed of as appropriate.

VI. COMPONENTS

ES 300h
(VIN begins with JTH)

Replacement items in red

No.	Part #	Qty	Contents of Part Kit	Qty	Tape Color	Remarks
1	04009-86325	1	FUEL PUMP	1		
2	04009-80747	1	FUEL SUCTION TUBE SET GASKET	1		
3			O-RING	2	GOLD	Dispose of 1 o-ring
4			REAR SEAT CUSHION LOCK HOOK	2		
5			O-RING	1	RED	Dispose (Not used)
6			O-RING	1	GREEN	Dispose (Not used)
7			FUEL TANK PIPE SETTING HOLDER	1	WHITE	Dispose (Not used)

Warranty will only reimburse dealers for the part numbers listed. Any other part numbers will not be accepted on the campaign claim.

VII. REMOVE FUEL SUCTION TUBE ASSEMBLY

Use TIS to confirm that this vehicle is eligible for the campaign before proceeding. Warranty will not pay claims on ineligible vehicles.

1. CHECK FOR DTC'S

- a. Using GTS+, perform a Health Check to check for Diagnostic Trouble Codes.

Note: *This Special Service Campaign covers only the replacement of the fuel pump and associated parts. It does not cover the diagnosis or replacement of any other parts on the vehicle.*

REMOVAL TIP: FUEL LEVEL

If the fuel level inside the fuel tank is above 1/3 of a tank, fuel may overflow from the fuel tank during the removal of the fuel suction tube assembly. Confirm the fuel level in the vehicle is below the specified level before proceeding. If necessary, drain fuel from the tank. Note that the guest owner letter for this campaign will recommend for the guest to arrive with the specified fuel level or less to reduce the amount of time needed by the technician to drain fuel. However, this is not a requirement for the guest. Refer to the Dealer Letter for a sample of the owner letter.

Note: If fuel needs to be removed from the tank, be sure to recover it into an approved fuel recovery system. Suitable systems are available from the [Lexus Approved Dealer Equipment](#) website.

REMOVAL TIP: CAM LOCK STYLE RETAINER

A set of Cam Lock Claws and Support Columns was previously supplied to each dealership for use with Safety Recall 20LA01 in May 2020. The configuration of the retainer engagement sections of those claws is an improved design over the SST version that is referenced in the TIS repair manual. These **NEW** claws that were shipped for 20LA01 are an improved design that enables a firm attachment to the retainer. In addition to the claws, two support columns were provided which will support the retainer more securely during installation and removal. Be sure to assemble and use the tools using the following procedures.

Campaign Tool Cam Lock Set:

S38197aSU

S38185aSU

S38186aSU

S38187aSU

S38189aSU

REMOVAL TIP: CAM LOCK STYLE RETAINER (cont.)

OK

NG

NG

Lightly tighten the adjuster

Fully tighten the 4 bolts

REMOVAL TIP: TUBE ASSY REMOVAL

- 1) Slightly raise the fuel suction tube assembly during this operation to make sure that the sender gauge does not interfere with the inside of tank.
- 2) Pull up the fuel suction tube assembly to the position indicated in the illustration. Pull portion (A) by hand to swing the lower part of fuel suction tube assembly downward, and then remove the fuel suction tube assembly from the tank.

- **DO NOT** bend the arm of fuel sender gauge assembly.
- **DO NOT** damage the wire harness at edges of service hole when removing the fuel suction tube assembly.

REMOVAL TIP: FUEL LEVEL SENDER

When removing and reinstalling the Fuel Level Sender from the fuel tank, take extra care with the arm of the fuel sender. It can be easily bent. Additionally, do not touch the electric circuit of the sender assembly.

Do not touch the electric circuit of the fuel sender gauge.

Do not deform the arm of the fuel sender gauge.

2. REMOVE FUEL SUCTION TUBE ASSEMBLY FROM VEHICLE

- a. Click the link [Removal ES 300h 2019](#) to access the repair manual instructions on TIS for removing the fuel suction tube assembly from the vehicle.

VIII. DISASSEMBLE FUEL SUCTION TUBE ASSEMBLY

DISASSEMBLY TIP: MAIN VALVE AND REGULATOR

When replacing the fuel pump, it is not necessary to remove the Fuel Main Valve or Fuel Pressure Regulator. These O-Rings are NOT included in the parts kit.

DO NOT remove

DISASSEMBLY TIPS: O-RING REMOVAL

During disassembly, the O-Ring may remain in the fuel pump housing. Be sure to inspect the housing after removing the fuel pump and remove the O-Ring if necessary.

1. DISASSEMBLE FUEL SUCTION TUBE ASSEMBLY

- Click the link [Disassembly ES 300h 2019](#) to access the repair manual instructions on TIS for disassembling the fuel suction tube assembly.

2. CLEAN SUB TANK ASSEMBLY

- Using brake cleaner, clean the sub-tank assembly.

IX. REASSEMBLE FUEL SUCTION TUBE ASSEMBLY

REASSEMBLY TIPS: O-RINGS

The part kits may come with O-Rings of different sizes. They are very difficult to tell apart visually. To identify the different size O-Rings, they will be wrapped in individual plastic bags with a piece of **COLORED TAPE** sealing it. The **COLOR OF THE TAPE** will identify the O-Ring size.

REFER TO THE COMPONENT DIAGRAMS IN THIS DOCUMENT TO DETERMINE TO CORRECT O-RING.

S38058aSU

1. REASSEMBLE FUEL SUCTION TUBE ASSEMBLY WITH **NEW** FUEL PUMP

- Follow the TIS Repair Manual instructions to reassemble the Fuel Suction Tube Assembly with a **NEW** Fuel Pump.

Refer to the Component diagrams at the beginning of these Technical Instructions to confirm the location of each replacement part.

Example Procedure:

HINT: The reused filter may be discolored.	- Remove the original O-Ring, Spacer and Fuel Filter from the original Fuel Pump. - Discard the original O-Ring and Fuel Pump, <u>saving the Spacer and Fuel Filter</u>. - Install the original Spacer onto the NEW Fuel Pump. - Install the NEW O-Ring onto the NEW Fuel Pump. Refer to the Component Diagram to determine to proper O-Ring, as identified by the colored tape on the bag. - Apply a small amount of engine oil to the NEW O-Ring to assure correct installation into the Tube Assembly. - Install the original Fuel Filter onto the NEW Fuel Pump. - Refer to the <u>Components diagrams</u> to review the other NEW parts to install.
--	--

- Apply engine oil to the **NEW** O-ring before assembly to assure correct installation into the Fuel Suction Tube.

Note: Fuel Pump O-Ring installation is critical to this repair. A visual inspection of the final assembly will confirm the correct installation.

2. REASSEMBLE FUEL SUCTION TUBE ASSEMBLY

- a. Click the link [Reassembly ES300h 2019](#) to access the repair manual instructions on TIS for reassembling the fuel suction tube assembly.

X. INSTALL FUEL SUCTION TUBE ASSEMBLY

1. INSTALL THE FUEL SUCTION TUBE ASSEMBLY INTO VEHICLE

- a. Click the link [Installation ES 300h 2019](#) to access the repair manual instructions on TIS for installing the fuel suction tube assembly into the vehicle.

Refer to the Component diagrams at the beginning of these Technical Instructions to confirm the location of each replacement part.

2. REMOVED FUEL

- a. If fuel was removed from the tank prior to disassembly, reinstall the originally recovered fuel into the tank.

3. CHECK FOR DTC'S

- a. Using GTS+, perform a Health Check to check for Diagnostic Trouble Codes.

Note: *This Special Service Campaign covers only the replacement of the fuel pump and associated parts. It does not cover the diagnosis or replacement of any other parts on the vehicle.*

◀ VERIFY REPAIR QUALITY ▶

- Confirm that all parts listed in the Components Diagrams have been properly installed on the vehicle
- Confirm no fuel leaks from vehicle
- Confirm any fuel drained from the vehicle has been reinstalled
- Confirm no DTC's are present
- Test drive to confirm normal operation while under load

XI. APPENDIX

A. PARTS DISPOSAL

In accordance with Federal law, please make sure all parts (original parts) removed from the vehicle are disposed of in a manner in which they will not be reused, ***unless requested for parts recovery return.***

B. CAMPAIGN DESIGNATION DECORDER
