44 Service Info: Tire pressure/loose wheel warning - general procedure

Release date: May 12, 2025

Condition

REVISION HISTORY		
Revision	Date	Purpose
2	-	Revised <i>Service</i> (Updated Information)
1	03/12/2025	Initial publication

Customer states:

The loose wheel or tire pressure warning is active. It may appear in combination with other messages.

Workshop findings:

The complaint can be reproduced. Various DTCs may be logged in the vehicle.

Technical Background

Not applicable.

Production Solution

Not applicable.

Service

The aim of this service info is to help locate issues related to the loose wheel warning. The following points may help when processing the complaint (although it is not always necessary to perform all steps):

- Update the vehicle to the latest software version (perform campaigns or other TSBs).
- Check addresses 812C and 0003, and 0065 (if available) for relevant DTCs for the loose wheel warning.
- If DTCs have been logged for individual wheels or all four wheels, performing wheel balancing or swapping wheels over may help.
- Check that the speed sensors and sensor rings for the affected wheel are clean and working correctly.
- If there are problems with the availability of the system, the issues in the vehicle should be remedied according to Guided Fault Finding.
- Always make sure that addresses 812C and 0003 are functioning correctly.
- Check DTCs in other control units and specific further TSB available which are possible causes of issues with the loose wheel warning in terms of the chain of effects or based on a message in the instrument cluster.

Warranty

This TSB is informational only and not applicable to any Audi Warranty.

Additional Information

All part and service references provided in this TSB (**2077226**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair

Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
