

Service Bulletin

Bulletin No.: 25-NA-056

Date: April, 2025

TECHNICAL

Subject: No Start, Multiple Electrical System Concerns

Brand:	Model:	Model Year:		Build Date:		Engine:	Transmission :
		from	to	from	to		
Chevrolet	Corvette E-Ray	2024	2024	—	—	6.2L (RPO LT2)	8-Speed Automatic (RPO MLH)

Involved Region or Country	North America, Europe, Middle East, Japan, Australia/New Zealand
Additional Options (RPOs)	HP1: ELECTRIFIED PROPULS - ELECTRIC, ELECTRIC AXLE FRT, SPORT
Condition	Some customers may comment that the vehicle will not start. Technicians may comment that the positive battery clamp may be loose to its post, and the physical electrical connection may be lost. - This may also result in a variety of electrical system misbehaviors.
Cause	This condition may be caused by a fatigued clamping hold.
Correction	The design of the clamp was updated to provide a more robust connection. If the clamp is loose to the post, do not tighten the old clamp. Replace the Battery Positive Junction Block Cable.

Important: Service agents must comply with all International, Federal, State, Provincial, and/or Local laws applicable to the activities it performs under this bulletin, including but not limited to handling, deploying, preparing, classifying, packaging, marking, labeling, and shipping dangerous goods. In the event of a conflict between the procedures set forth in this bulletin and the laws that apply to your dealership, you must follow those applicable laws.

Service Procedure

Refer to *Battery Positive Junction Block Cable Replacement*.
