Title	Passenger Ambient Lighting Not Illuminated
Category	Electrical
Last modified	19-May-2025 00:00:00
Symptom	201000 Lighting Systems
Attachments	Ambient Light Guide Location.PNG (Ambient Light Guide Location.PNG)

Content**Model / Model Year / Derivative**

Defender / 25MY Onwards / all variants

Situation:

JLR Engineering investigations have identified that the passenger ambient light guide is not illuminating at Pre-Delivery Inspection (PDI).

Cause:

Vehicles have been manufactured away from the required specification.

Action:

Refer to the service request below.

Service Request:

During PDI make sure the passenger ambient light guide is illuminating as expected. If the passenger ambient light guide is not illuminating as expected, take necessary actions to inspect and replace if required.

Any completed actions must be claimed through the Misbuild Warranty Process and NOT through the standard JLR Warranty Process.
