Case Number: S2508000047

Release Date: June 2025

Symptom/Vehicle Issue: Parking Lamps do Not Illuminate When the Vehicle is Remotely Started

Customer Complaint/Technician Observation: The owner complains during a remote start request the parking lamps are not turning on. The technician has observed the same, and there are no modules that have set any Diagnostic Trouble Codes (DTCs).

Discussion: If the lamps work during all other operations as they should with no DTCs setting, enter the radio menu for lights, ensure the “Flash Lamps With Lock” setting is selected on. Toggling the setting and allowing a full BUS sleep cycle should allow the setting to accept the changes and allow the lights to come on during a remote start command as expected.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
