

SSM 53992 2025 Nautilus - Features Turned Off During Vehicle Shipment - Built On Or After 16-Jun-2025

2025 Nautilus vehicles built on or after 16-Jun-2025 will come with the climate control system, interior lamps, ambient lighting, autolamp exit delay and easy entry and exit features turned off. This is being done to preserve battery state of charge during vehicle shipment. These features should be turned back on during the electronic pre-delivery inspection (ePDI) process and prior to delivery to customers. Refer to the appropriate Owner's Manual sections for additional instructions of how to turn these features on.
