

DIAGNOSTIC TROUBLE CODE P0A1B STORED IN EPIC – GENERATION 4-PHEV

Customer Voice:

- 'loss of drive' warning in red on the instrument panel cluster and the Malfunction Indicator Lamp (MIL) is illuminated. The fault occurs during start-up and only with the vehicle stationary.

Technical Description:

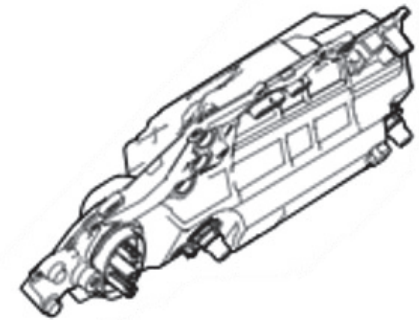

- P0A1B – Drive Motor “A” Control module Performance is set in the EPIC.

Status:

- DO NOT CLEAR THE CODES- run diagnosis and breakdown for fault.
- If DTC P0A1B-00 is stored in the Gen 4 PHEV EPIC, retailers are to complete the Electric Power Inverter Converter Health Check application through the Workflow/Diagnostic Test.
- The Workflow/Diagnostic Test may request you to raise a Technical Assistance (TA) to PTS_120 if required. Engineering are currently developing a software update for this concern.
