New MRT Toolbox Foam Organizational System

USA Only

Vehicle Type: All Porsche

Subject: New MRT Foam Organizational System

Information: Porsche Special Tools & Equipment has identified the need for a new MRT Foam Organizational System.

With the new system we have compressed the overfilled MRT toolboxes by approximately 45%.

The current paper drawer liners will be replaced with foam inserts with a completely new layout and Repair Group based grouping system.

ONLY 6 Long box drawers and 18 Tall box drawers are Foamed. All remaining drawers are not foamed and will be utilized as expansion. Note - Classic Toolbox is not included in this project and will remain paper liners.

When there is a sufficient number of new tools within a repair group, a new foam insert will be created and placed in one of the expansion drawers. The new foam will be Auto-Shipped at that time.

Automatic Shipments from the supplier started in June 2025 and will take approximately 10 months to complete.

This auto-ship package includes 24 foam liners.

For any additional information or order additional sets, open a Special Tools PRMS ticket.

Tools

Included:	<u>Tool Number</u>	<u>Order Number</u>	<u>Quantity</u>	<u>Phase</u>
	MRTFOAM	MRTFOAM	1	Rolling

New MRT Toolbox Foam Organizational System

USA Only

Highlights:

- Tool Storage System drawers have been renumbered to follow the repair groups order.
- Discontinue the paper drawer liners
- Removal of the steel dividers and partitions
- Implementation of a new Repair Group based origination system
 - example - Tools in Repair Group 1 are placed together
- Drawers will be condensed and wasted space utilized
- Drawers that are "full" of tools will have tools placed in foam inserts
- This system will have expansion room between Repair Groups
 - example - There are a number of empty drawers at the end of Repair Group 3 before Repair Group 4 starts.
- As new tools are auto-shipped, you will be instructed to place them in the expansion space of the corresponding Repair Group
 - example - New Group 4 suspension tools are auto-shipped, your PC will utilize the expansion space immediately following the foam of Group 4
 - (the old dividers and partitions can be utilized)
- When the expansion space is "full" PCNA will auto-ship a new foam liner for that individual drawer.
 - The expansion drawer full of loose tools will be cut into foam.
- **The MRT Foam Storage system will Auto-Ship to your Porsche Center. \$5,499 plus shipping**

Important Notice: Technical Bulletins issued by Porsche Cars North America, Inc. are intended only for use by professional automotive technicians who have attended Porsche service training courses. They are written to inform those technicians of conditions that may occur on some Porsche vehicles, or to provide information that could assist in the proper servicing of a vehicle. Porsche special tools may be necessary in order to perform certain operations identified in these bulletins. Use of tools and procedures other than those Porsche recommends in these bulletins may be detrimental to the safe operation of your vehicle, and may endanger the people working on it. Properly trained Porsche technicians have the equipment, tools, safety instructions, and know-how to do the job properly and safely. Part numbers listed in these bulletins are for reference only. The work procedures updated electronically in the Porsche PIWIS diagnostic and testing device take precedence and, in the event of a discrepancy, the work procedures in the PIWIS Tester are the ones that must be followed.
