Accessory Protocol Interface Module - PHX

PHX-25.1.2.4

Software Update 11 - Center Touch Screen

Accessory Protocol Interface Module

PHX-25.1.2.4

1

New Features and Enhancements

"This software update contains the following key changes:

- You can now share instant voice feedback directly from your vehicle to help us advance the Lincoln experience. To begin, tap ""Record Feedback"" on the App screen. For safety or service concerns, please contact your retailer or Lincoln Concierge. Available in the U.S. only.
- You can now easily discover your vehicle's digital features and learn about new or upcoming capabilities right on your screen using the new Quick Tips App. This dedicated learning hub provides up-to-date demos and tutorials.
- You can now enjoy some fun with the new Arcade Sports Collection app, offering retro multi-player games like shuffleboard and button soccer that you can play using your phone as a controller (with more games planned for the future!).
- Navigation has been enhanced to include helpful lane guidance for upcoming turns and exits.
- Managing your radio presets is now simpler and more intuitive, making it easier to add or remove your favorite stations.
- Authorizing your vehicle's modem is now a quicker process; you can do it by scanning a QR code.
- You'll find improved messaging and information related to your vehicle's connected features.
- You'll notice improvements to the look and feel of the climate controls and other general areas of the user interface."
