<b>Involved Region or Country</b>	North America
<b>Condition</b>	As part of our ongoing quality improvement efforts, the E90 ECM part numbers 12711353, 12719704, 12731719 and 12740717 have been placed on restriction through TAC.
<b>Cause</b>	This restriction is intended to assist GM Engineering with product feedback.

### Correction

Prior to contacting GM Technical Assistance for part authorization, verify the concern is not associated with the following:

Vehicles with DTCs P062B and/or P060C set in the ECM.

**Note:** If addressing DTC P060C, please review and follow the latest version of bulletin 25-NA-232 if applicable before proceeding.

If either or both of the DTCs are set perform the following:

Step 1: Verify ECM has the latest software, reprogram and re-evaluate as needed.

Step 2: Clear all DTCs, perform a global reset and re-evaluate.

Step 3: If either/both DTCs do not reset promptly after the previous step, do not attempt to replace ECM as this will not resolve this issue. (Additional information for 2023-2025 Model Years available in latest version of PIT6110) If either of the DTCs do reset promptly after the previous step than an ECM should be ordered.

If the previous concern is not applicable, be sure to have the SI document that has led to ECM replacement available and be prepared to review diagnostic steps leading to ECM replacement with the TAC agent.

**U.S. Dealers:**
