

## UPDATE TO DTNA PARTS QUALITY ALERT STOCK HOLD on UFU R61709

Communication Type: News

Date: 8/21/2025

**Date: 8/21/25**

Part Number: **UFU R61709**

Description: **FUEL FILTER KIT**

Quality Problem: filters were produced with **O-Ring for "bowl" that is TOO large**

### **New Information:**

1. Dealers should NOT file PARs for returns. Continue to hold/quarantine the stock.
2. Supplier has been provided a list of dealer purchases by location.
3. Supplier will ship replacement O-rings to dealerships for replacement at your facilities.  
Goal is to have new O-Rings in dealer hands by Friday, September 5.
4. DTNA will replace O-rings for part stock at PDCs.
5. Supplier will replace O-rings for their part stock at their US warehouse.

### **Action needed:**

1. For short term coverage on truck downs consider purchasing **FG FS20176 or DN P552709**.
2. Continue selling any **stock of RAI R61709 which is good**. It is not impacted.
3. Once new O-Rings are received **we recommend marking box with "OK" next to part number for visual reference. Note your UFU boxes may be all white or blue and white (see attachment)**.
