Priority Update - Seat Functionality

Seat Control Module

SCMA-25.5.5.3

1

Seat Operations

"This software update contains the following key changes:

- Resolves disruptions to the Power Seats operations and to the Heated and Ventilated seat functions.
- Ensures the Power Running Boards will function consistently.
- Your saved seat and steering wheel positions may reset after this update. If this happens, you will need to re-save your preferred positions"
