

## REAR BRAKE CALIPER PISTON DUST BOOT DISTORTION RISK

### Range Rover

- 22MY-On Range Rover
- 23MY-On RR Sport

### DEFENDER

- 20MY-On Defender
- ### Discovery
- 17-19MY Discovery

### Customer Voice:

- The brakes feel like they drag.

### Technical Description:

- When pushing the rear brake caliper pistons back during a brake service, the caliper piston dust boot may become twisted or distorted if a twist method is used to retract the piston.

### Status:

- SSM 76375 has been published to address this concern, providing correct instructions on rear caliper piston retraction.
- Please ensure this SSM is referenced when performing rear brake services.
