

Lucid OTA v2.8.0 Updates, Performance Improvements & Optimizations

Overview

[AC Charging](#)

[DreamDrive Pro](#)

[Mobile App](#)

[Hood Strut](#)

AC Charging

Custom power limits for AC charging can now be set, ranging from 10A to 80A. Once configured, the custom power limit activates automatically when within 160 feet (50 meters) of a saved location.

DreamDrive Pro

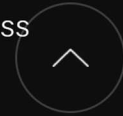

Hands-Free Drive Assist and Hands-Free Lane Change Assist are now available in vehicles equipped with DreamDrive Pro. This functionality requires the Driver Monitoring System to confirm driver attentiveness, which depends on maintaining a clear line of sight—adjustments to seating or steering wheel position may be necessary.

WARNING: Drive Assist is designed to enhance comfort and convenience but is not a collision warning or avoidance system. The driver remains responsible for staying alert, driving safely, and maintaining control of the vehicle at all times.

NOTE: Hands-Free capabilities are available only on select controlled-access highways.

Mobile App

Please use the Lucid mobile app for routing to Tesla Superchargers. In-vehicle routing will be added in a future update.

Hood Strut

The operation of the power hood strut on vehicles equipped with this feature is refined for smoother operation.
