

Service Campaigns TDQ/TDQA– Temporarily Suspended, Effective 09/04/25 (1:00PM)

Hyundai Motor America is currently investigating an ongoing auto mode update concern with software GDS event #1243. Some vehicles are not being able to complete the update after multiple attempts.

Technicians may experience consistent cluster speedometer software upgrade failures when attempting to update to the latest version. A revised version of the software is currently in development to address the update failures and recover any failed modules.

We will provide an update once the issue is resolved and the suspension is lifted.

Hyundai appreciates your cooperation and support. Questions may be directed to the Warranty HELP line at 1-877-446-2922.
