Accessory Protocol Interface Module - PHX

PHX-25.1.2.4

Software Update 11 - Center Touch Screen

Accessory Protocol Interface Module

PHX-25.1.2.4

1

New Features and Enhancements

"This software update contains the following key changes:

- You can now share instant voice feedback directly from your vehicle to help us advance the Lincoln experience. To begin, tap ""Record Feedback"" on the App screen. Available in the U.S. only. For safety or service concerns, please contact your retailer or Lincoln Concierge.
- You can now play compatible video and game apps on your panoramic screen. While parked, try opening a video streaming app, starting your favorite TV show, and then tapping the icon in the upper right-hand corner to move the video playback to the panoramic screen. May require app download from the Play Store. Not all apps are compatible. Playing games on the panoramic screen requires a connected game controller.
- You can now easily discover your vehicle's digital features and learn about new or upcoming capabilities right on your screen using the new Quick Tips App. This dedicated learning hub provides up-to-date demos and tutorials.
- Have some fun with the new Arcade Sports Collection app, offering retro-themed games like Shuffleboard and Button Soccer with more coming soon! Compete with your friends and family in your vehicle, even if they're in the backseat, by using your phone as a controller. Download Arcade Sports Collection from the Play Store, located on the App screen.
- Managing your radio presets is now simpler and more intuitive, making it easier to add or remove your favorite stations.
- You'll find improved messaging and information related to your vehicle's connected features.
- You'll notice improvements to the look and feel of the climate controls and other general areas of the user interface."
