Snap-On (SBS) Pricing Adjustments

USA Only

Vehicle Type: All Porsche

Subject: The pricing of Special Tools and Equipment through Snap-On Business Solutions is increasing.

Information: Porsche Cars North America has been informed by our business partners VWGoA and SBS of recent developments that have or may influence product pricing through SBS (Porsche.snapon.com).

The statement from VWGoA is as follows:

Regulatory changes and evolving trade policies have introduced new cost pressures across a broad range of tools and goods within the automotive and industrial sectors.

The most affected categories include:

- Section 301-related classifications
- Items subject to enhanced import controls
- Products impacted by international trade agreements
- Materials such as steel and aluminum
- General import classifications
- Compounded duties on derivative goods

These shifts have resulted in increased costs throughout the supply chain, which will affect pricing on many of our products.

Accordingly, adjustments to pricing will be effective immediately.

We (VWGoA and SBS) remain committed to transparency and responsiveness and will continue to monitor developments closely while seeking opportunities to mitigate cost impacts wherever possible.

Thank you for your continued understanding.

For all questions related to the information above, **contact SBS customer care 1-855-895-2013**
or PorscheTEP@SnapOn.com

Important Notice: Technical Bulletins issued by Porsche Cars North America, Inc. are intended only for use by professional automotive technicians who have attended Porsche service training courses. They are written to inform those technicians of conditions that may occur on some Porsche vehicles, or to provide information that could assist in the proper servicing of a vehicle. Porsche special tools may be necessary in order to perform certain operations identified in these bulletins. Use of tools and procedures other than those Porsche recommends in these bulletins may be detrimental to the safe operation of your vehicle, and may endanger the people working on it. Properly trained Porsche technicians have the equipment, tools, safety instructions, and know-how to do the job properly and safely. Part numbers listed in these bulletins are for reference only. The work procedures updated electronically in the Porsche PIWIS diagnostic and testing device take precedence and, in the event of a discrepancy, the work procedures in the PIWIS Tester are the ones that must be followed.
