

GPOP - Issue Review System

Part Number: 7FX93TRMA\$

Part Description: Bezel Overhead Console

Issue Description: Power top /sky one touch switch falls out of the bezel or is pushed inside it or won't stay in place. Or if there's miscalibration in the power top. If the switch has no physical damage, is not broken or separated, but still doesn't stay in place, verify that the bezel brackets that hold it in place are broken and are the cause of the problem. If the bezel is broken, and the switch is not, replace only the bezel trim, DO NOT replace the switch. If there's miscalibration in the power top, and there's no physical damage to the switch and it works accordingly, DO NOT replace the switch.
